This publication would not have been possible without the prior efforts of a dedicated group of family historians. They are Robert Rigby Hull, A. C. Hull, Clella Hull Holland and Norma Hull Carver. They used many histories compiled by Gretta Rallison and with further research and collection of information they compiled a book which was published by Robert Rigby Hull titled: "Ancestry, Life and Travels of: Robert Rigby Hull and Grace Evelyn Bailey" in 1982. This book of histories formed the basis for research and histories that will make up this book. They were very careful in noting things they didn't know or had information on and noted impressions they had on certain historical events and genealogies. I have used these hints and notes to use as we have traveled to Northern Ireland, Scotland and Australia in identifying items of interest to research and discover. Through these efforts we have greatly expanded the number of family lines, histories and data items.

I would like to thank so many cousins and friends across the world, who have taken many hours of their time to compile, collect and research people and places that we didn't know before. Cynthia and Murray Hull in Victor Harbor, Australia have spent over 25 years searching the whole world for Hulls and cousins. Cynthia is tireless in looking under every cemetery headstone for "relies" as she calls them. With her help we have found the two sisters (Susanna and Peggy Jane) of Adam Hull one in New Zealand and the other in Dungiven, Ireland John and Samuel's families who are Thomas II's brothers plus many, many more unknown Hulls. She has email requests out all over the world and face book contacts everywhere. Murray set out years ago to travel most of Australia and the United States to meet all of the Hull cousins. Cynthia and Murray met and married from this search and together they have been invaluable and so giving of their time and resources.

One of the first researchers down in Australia was Robert Henry Hull who helped Murray in identifying and connecting to the Hulls in Utah and Idaho. He passed away this past year and we must acknowledge his great efforts.

I would like to thank all of the cousins who have traveled with us along with my sister Carol Hull Earl to Australia, Ireland, Scotland and England. Those trips have enriched our lives and have helped define our heritage. Carol has headed the Hull reunion for many years and kept histories and genealogies for this history book and for our family. She is a family treasure. Each family has at least one genealogist who pokes around in the old records to help extend the line and pass on to generations the histories and family lines. I will name a few but please accept my congratulations for your efforts if I don't name you.

To name a few: Butch Hull, Belva Hull Moyle, Lori Manning Liljenquist, Sonja Issacson, Uncle Bob's daughters Maxine, Marion and Nila, Jayleen Hull, Mavanee Mitchell Steele, Guinivere Torrie. Robert Parker has developed a web site for our family at <http://www.hullfamilyhistory.org/>. It takes a great deal of skill and time to maintain the website.

The last five years I have explored the new DNA research options and with the help of Jim Hull of Hull Family DNA and a great committee of the Hull Family of America, along with many new DNA cousins we have slowly put together 15 or 16 new lines of Hulls from the East Coast of the US to England and Australia. In order to make this work many of you have contributed to a fund to sponsor DNA testing and this has made this project go forward so easily. Thank you for your help and sharing of your resources to make this happen.

Finally, it has been my pleasure to travel the world meeting our family and learning your history, your specialness and receiving of your kindness. We have stayed with Janet Hynds Kerr in Dungiven twice, Cynthia and Murray twice in Australia and of course my dear companion, Linda, has enjoyed these travels but put up with the constant research and emails that clog our computers daily. Linda is also my right hand and left hand in completing this book. I also have had terrific help from our son Brandan in verifying genealogies and our daughter Rebecca Lynn Henson who has changed many, many scanned documents into word or just re-typed histories. Thank you all for sharing of your photos, histories and genealogies.
